***Pumps Also Available With Various Rotor Sizes
Also Rear Pressure Housing If Required***

SERIES 2 REMOTE OIL PUMP

Description:- An efficient, compact and versatile belt driven 3 stage rotor pump, having advanced gallery design and balanced pressure relief system.

Rotor capacity:- 2.76 UK Gal/1000 r.p.m/Inch rotor length.

Efficient:- Optimum gallery form and size keep flow losses to a minimum, which combined with careful matching of the PRV and rotor delivery characteristics produce a balanced, efficient package.

Compact:- Main body dimensions are 3.06" wide, 2.36" high and 7.50" in length. 6 x 5/16" UNC tapped bosses facilitate pump mounting in a variety of positions. Multi-positioned tach drive mounting.

Inlet bosses are machined to accept a selection of flanged swivel unions. Outlet bosses are threaded 1/2" BSP and a selection of unions are available to suit customer requirements.

Scavenge section outlet galleries are siamesed allowing a choice of single or double scavenge outlets.
